Navigating the Slide Presentation

You can advance to the next slide by **clicking your mouse** or pressing the **spacebar** on your keyboard.

You can also use the **arrow keys** on your keyboard to move forward or backward through the presentation.

You can also **hover your mouse over the bottom-left** of the slide and use the command bar there to navigate the presentation. The tool will disappear shortly after you move your mouse, so that you can see the slide unimpaired by the bar -- to make the bar reappear, just move your mouse back into the lower left. Clicking on the “Slide #” option once will allow you to see the list of slides so that you can choose a particular slide you are looking for. Clicking on the “Play” button will set the presentation to “automatic” and will move through the slides at 10 second intervals.
